

Monthly average X2 graph for the wet years 2006 and 2011 and the dry year 2009. Lower X2 values indicate a more westward position of the low salinity zone. 2006 and 2009 data is from DWR's DayFlow database. 2011 data is from DWR's CDEC database and is preliminary and subject to change. Daily X2 data was not available from CDEC for March 18 - April 27, 2011. The March 2011 X2 value is the average of March 1-17 and the October 2011 X2 value is the average of Oct 1-12 daily X2 values.
